

Front-End Web Development INTERNSHIP Program

Concept Note

Submitted by:

The M-team

(Students of IFTM University, Moradabad)

Under IBM Web Development Internship

Introduction:

My project is based on my brother's cyber café website. He has no website for his cyber café. So, with this project I'll make a website for his cyber café.

Why does it matter to Customers:

With the help of this website, customers will not have to face much problems like finding address, contact details etc.

Programming Languages used:

- a. HTML
- b. CSS

Platform used:

- a. Visual Studio Code.

Features of the website:

- a. User-friendly interface: This website will have a very easy to use interface so that users can easily find their required section of the website.
- b. Social sharing: Users will be able to share the website to the social media platforms to increase the visibility of the website and attract more customers.
